This puzzle marks the 156th anniversary of a defining point in the field of 1dn,41up (Clue 34), and for one thematic concept in particular.

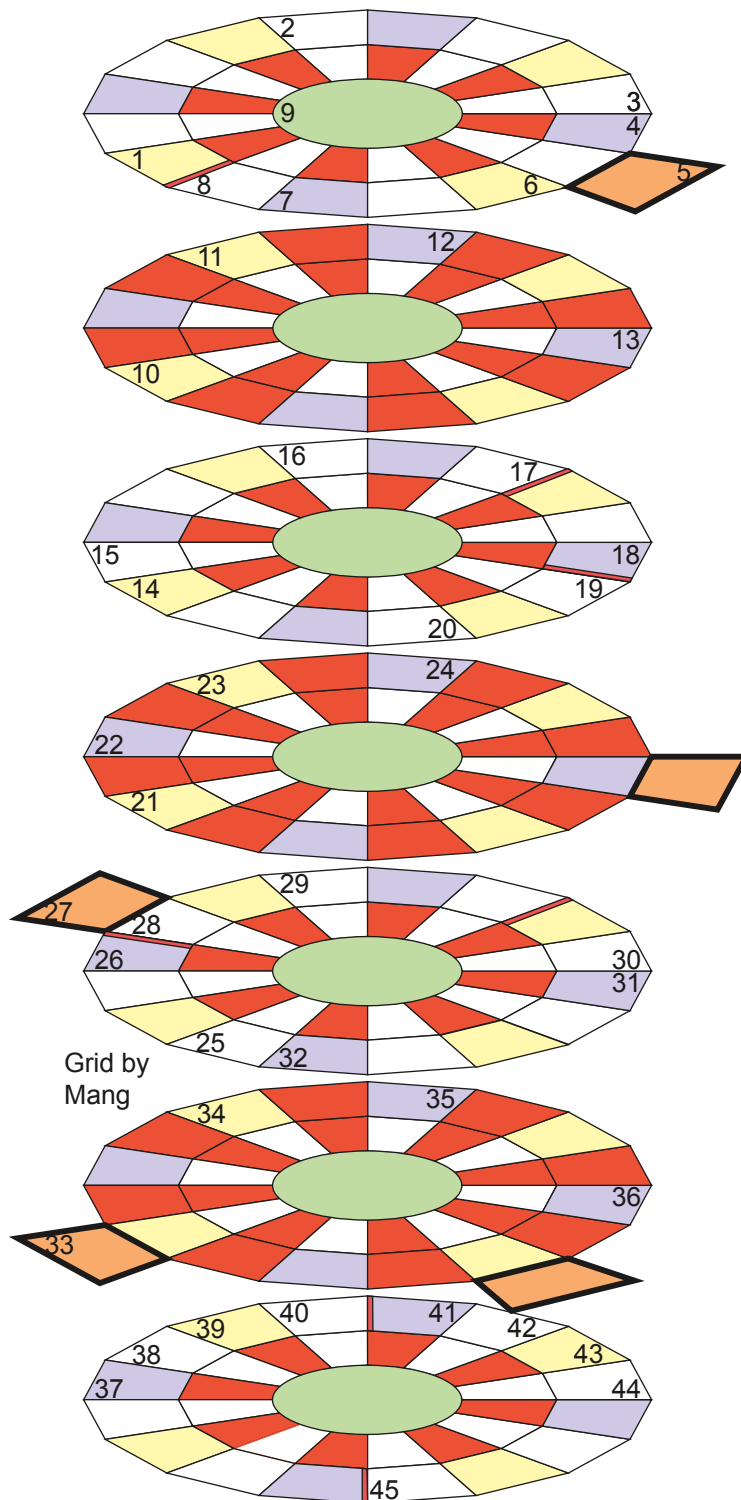

Two asterisked clues each lead to an undefined thematic solution, while five of the other clues each contain two adjacent surplus words to be removed before solving; in each case, these two words provide an anagram for one of the five unclued thematic solutions, A1 to A5 (directions on Clues page).

Solvers should submit with their entry two extra thematic items: (a) a five-letter word derived from the cells highlighted in bold/orange; and (b) a seven-letter word (the celebrated thematic concept the five-letter word loosely defines) which should appear in an appropriately treated fashion at 9d, highlighted in green.

Clues are presented in alphabetical order of their solutions.
